

MARIAM MOHAMED

UX/UI DESIGNER

[Mariammohamed14122004@gmail.com](mailto:MariamMohamed14122004@gmail.com) | +20 11 49114886 | [LinkedIn](#) | Cairo, Egypt

SUMMARY

Third-year Computer Science student passionate about UX/UI design and creating engaging digital experiences for both mobile and web platforms. Skilled in Figma, HTML, CSS, and JavaScript, with hands-on experience designing projects such as a skincare website and a jewelry mobile application. Dedicated to combining creativity, usability, and user research to deliver intuitive and visually appealing interfaces. Strong teamwork, communication, and research skills, with internship experience and a creative background in jewelry design that adds a unique artistic perspective to digital products.

SKILLS

- FIGMA.
- HTML.
- Python.
- CSS.
- Flutter.
- SQL.
- Machine Learning.
- Laravel
- Communication skills.
- Teamwork.
- Attention to detail.
- Adaptability

INTERNSHIPS

Information Technology Internship AUG 2024 – SEP 2024
El Sewedy Cables Cairo, Egypt

- **Completed a technical internship at El Sewedy Cables**, gaining foundational knowledge in servers, data centers, and networking infrastructure; explored different cable and wiring systems used in industrial and enterprise environments while strengthening technical research and teamwork skills.

PROJECTS

AI-Driven Forest Fire & Smoke Detection System APR 2026 – MAY 2026
El Sewedy University Al Sharqia, Egypt

- **Developed a deep learning image classification system** utilizing Python and OpenCV to accurately categorize environmental scenes into fire, smoke, and non-fire states.
- **Built, optimized, and evaluated a custom lightweight CNN** alongside a pre-trained MobileNetV2 transfer learning model to benchmark performance and computational efficiency.
- **Applied data augmentation and class weighting techniques** to mitigate dataset imbalance, validating model accuracy through confusion matrices and classification reports.

IoT-Based Fire & Smoke Detection System NOV 2025 – DEC 2025
El Sewedy University Al Sharqia, Egypt

- **Engineered an automated fire safety system** using an ESP32 microcontroller to analyze real-time data from temperature, gas, and flame sensors.
- **Programmed logic via Arduino IDE** to automatically trigger a buzzer alarm, status LCD, and smoke exhaust fan during hazard states.
- **Integrated Firebase and Blynk** to log environmental data to a cloud database and broadcast instant mobile emergency notifications.

Event Planner App APR 2025 – MAY 2025
El Sewedy University Al Sharqia, Egypt

- **Developed a cross-platform mobile application using** Flutter and Dart to streamline event creation, organization, and scheduling for users.
- **Integrated Firebase for** secure user authentication and real-time data storage, coupled with cloud push notifications and local reminders to maximize user engagement.
- **Built an intuitive user interface featuring** dynamic QR code generation, image uploads, and efficient state management to ensure a high-performance user experience.

EDUCATION

Bachelor Computer Science
SUTech ElSewedy University • Egypt, Al Sharqia • 2027
